Please reject petition 04-160. xm radio as far as i am concerned is the best invention to come out in years. I pay for the service. And I think that it is well worth it for the variety etc. No commercials are one of the better points. Now you want to limit traffic and weather. What will you try to limit next? There are many more demanding issues for the government to deal with. It is all about the money. Forget about freedom of speech and choice. I guess it all comes down to what public official needs money for their campaign. There will always be an elected official who can be bought off. We only get xm if we pay for it. I hope if Howard Stern goes to xm you do not try to take him off the air like people are trying to take him off of over the air radio. Our elected officials should be spending more time protecting us from terrorists than spending time looking for a free buck at the expense of our freedom.
